Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. The two sets of scales used for core evaluation questions and the associated weights are:

Strongly Agree (5)
Agree (4)
Neutral (3)
Disagree (2)
Strongly Disagree (1)

Excellent (5)
Very Good (4)
Satisfactory (3)
Unsatisfactory (2)
Very Unsatisfactory (1)

The Mean is calculated by adding all of the weights for a single question and dividing by the number of respondents. The course workload question is not averaged.

The number of students (e.g. respondents) marking each option is reported for each of the items. These frequency distributions provide information about the level of student ratings and the spread and shape of the class distribution of responses. The distributions thus provide a picture of student perception of a course.

Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no individual method gives the complete picture of an instructor's teaching effectiveness; multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor.

Creation Date: **Friday, August 23, 2024**

Course Questions

The course assignments improved my ability to apply quantitative skills to real-world problems. (Flag Question)

Instructor Questions

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Responded	Mean
The instructor clearly explained the course objectives and expectations.	71.4%	28.6%	0.0%	0.0%	0.0%	7	4.71
The instructor fostered an inclusive learning environment.	71.4%	28.6%	0.0%	0.0%	0.0%	7	4.71
The instructor effectively explained the concepts and subject matter in this course.	71.4%	28.6%	0.0%	0.0%	0.0%	7	4.71
The instructional techniques kept me engaged in learning.	71.4%	28.6%	0.0%	0.0%	0.0%	7	4.71
The instructor checked for student understanding of the concepts presented in the course.	71.4%	28.6%	0.0%	0.0%	0.0%	7	4.71

Overall Questions

College, School, or Unit Questions

Comment Questions

Identify aspects of the course that were the most effective in helping your learning.

Comments
Lectures were really great and they were recorded as well.
Professor Bolfarine has been one of the greatest professors I have ever had the privilege of learning from. In contrast to my previous experience in Stats 301, where the emphasis was more on slides and a continuous lecture flow without much opportunity for personal interaction, Professor Bolfarine's approach has been transformative.
His lectures are structured in a way that bridges basic knowledge gaps and alleviates anxiety related to statistical analysis with R-studio. His explanations and teaching methods have sparked a genuine excitement for learning statistics. While his expertise in the field is evident, what sets him apart is his ability to simplify complex concepts into a standardized process that is easily understood by all students—a true talent in teaching.
Professor Bolfarine's teaching style is not only easy to grasp but also tailored to meet the diverse needs of his students, demonstrating his caring personality as an educator. I sincerely hope to have the opportunity to take more classes with Professor Bolfarine in the future. His teaching has not only enriched my understanding of statistics but has also inspired a passion for the subject.
Walking through the examples in class really helped understanding
Cared very much and did an excellent job.
Dr. Bolfarine's well structured lectures and availability outside of class.
Out of the ENTIRE stats department, Professor Bolfarine is the nicest and best professors for this course. He makes sure that EVERYONE is on the same page and offers a welcoming class environment, making students feel comfortable asking/answering questions during class. He also doesn't fly through material, which I can't say for the rest of the stats professors.

Identify the aspect of the course that you found most challenging, why you found it was challenging, and suggest one thing that could be done to help future students meet that challenge more effectively.

Comments
I don't really have anything to suggest I thought it was a great course.
Nothing was challenging, just recording the classes with the in class camera that has the view of the board would be nice!
Knowing all the commands was a little challenging, Maybe make a list or explain why each command is what it is.
