Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. The two sets of scales used for core evaluation questions and the associated weights are:

Strongly Agree (5)
Agree (4)
Neutral (3)
Disagree (2)
Strongly Disagree (1)

Excellent (5)
Very Good (4)
Satisfactory (3)
Unsatisfactory (2)
Very Unsatisfactory (1)

The Mean is calculated by adding all of the weights for a single question and dividing by the number of respondents. The course workload question is not averaged.

The number of students (e.g. respondents) marking each option is reported for each of the items. These frequency distributions provide information about the level of student ratings and the spread and shape of the class distribution of responses. The distributions thus provide a picture of student perception of a course.

Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no individual method gives the complete picture of an instructor's teaching effectiveness; multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor.

Course Questions

The course assignments improved my ability to apply quantitative skills to real-world problems. (Flag Question)

Instructor Questions

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Responded	Mean
The instructor clearly explained the course objectives and expectations.	60.0%	40.0%	0.0%	0.0%	0.0%	5	4.60
The instructor fostered an inclusive learning environment.	60.0%	20.0%	20.0%	0.0%	0.0%	5	4.40
The instructor effectively explained the concepts and subject matter in this course.	60.0%	20.0%	20.0%	0.0%	0.0%	5	4.40
The instructional techniques kept me engaged in learning.	80.0%	0.0%	20.0%	0.0%	0.0%	5	4.60
The instructor checked for student understanding of the concepts presented in the course.	80.0%	20.0%	0.0%	0.0%	0.0%	5	4.80

Overall Questions

College, School, or Unit Questions

Comment Questions

Identify aspects of the course that were the most effective in helping your learning.

Comments
The lectures and TA really helped me work with R and were always kind when I made a stupid mistake. Great class, would take again if I had to.
KC and hw
Very knowledgeable professor

Identify the aspect of the course that you found most challenging, why you found it was challenging, and suggest one thing that could be done to help future students meet that challenge more effectively.

Comments
The class was really early in the morning. I mean there would only be maybe and I mean MAYBE 4 people a class. In reality there are about 25 people in that class (I know this because when I showed up to the Midterm, the entire room was full vs. during lecture when I could throw a football from one corner to the other and hit no one). Everyone who did show up to lecture was obviously SUPER tired and thus made it a challenging environment to learn in. I mean one time the professor was so exhausted instead of writing the sum command he put cum and no one noticed (this was obviously a mistake do not fire him). I also made silly mistakes in class because I was tired. I understand that this class had to be offered at 8 AM because there are only so many time slots however, I think would be more useful if it were offered at 5 PM instead of 8 AM. Other than that the professor was funny, helpful, deeply knowledgeable, etc.
quizzes should be in middle not end
pace, lots of information
