Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. The two sets of scales used for core evaluation questions and the associated weights are:

Strongly Agree (5)
Agree (4)
Neutral (3)
Disagree (2)
Strongly Disagree (1)

Excellent (5)
Very Good (4)
Satisfactory (3)
Unsatisfactory (2)
Very Unsatisfactory (1)

The Mean is calculated by adding all of the weights for a single question and dividing by the number of respondents. The course workload question is not averaged.

The number of students (e.g. respondents) marking each option is reported for each of the items. These frequency distributions provide information about the level of student ratings and the spread and shape of the class distribution of responses. The distributions thus provide a picture of student perception of a course.

Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no individual method gives the complete picture of an instructor's teaching effectiveness; multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor.

Course Questions

Why did you take this course?

During this course, I gained a deeper understanding of the subject matter.

Statistics	Value
Mean	4.33

The course was well organized.

Statistics	Value
Mean	4.61

Overall, approximately what percentage of the course meetings did you attend or complete (online, in person, or asynchronously)?

Statistics	Value
Mean	94.11

The course assignments improved my ability to apply quantitative skills to real-world problems. (Flag Question)

Instructor Questions

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Responded	Mean
The instructor clearly explained the course objectives and expectations.	55.6%	38.9%	5.6%	0.0%	0.0%	18	4.50
The instructor fostered an inclusive learning environment.	61.1%	38.9%	0.0%	0.0%	0.0%	18	4.61
The instructor effectively explained the concepts and subject matter in this course.	61.1%	33.3%	5.6%	0.0%	0.0%	18	4.56
The instructional techniques kept me engaged in learning.	55.6%	27.8%	11.1%	0.0%	5.6%	18	4.28
The instructor checked for student understanding of the concepts presented in the course.	72.2%	27.8%	0.0%	0.0%	0.0%	18	4.72

Overall Questions

College, School, or Unit Questions

Comment Questions

Identify aspects of the course that were the most effective in helping your learning.

Comments
The walkthrough after the in class quizzes were very helpful. This was good preparation for the exam and the prof was very patient with us.
The quizzes were the most effective in helping my learning.
the quiz
attending office hours and reviewing class notes/recordings
Bolfarine is very communicative with his students and understanding of all of our situations. He made the class a very inclusive learning environment and never shied away from helping his students in need.
Taking the quizzes at the beginning of class and working on it together so that I would be able to actually understand what I was expected to do
I believe that the slides reviewing the material that was sent out by the TA's was the most helpful for me to understand the material.
Bolfarine was very helpful going through all of the homeworks and quizzes to give his students a better understanding on topics that were difficult.
Going over examples about problems we will see on the homework, and going over quizzes at the end helped a lot.
n/a
very nice professor, really broke down the material and made me understand it better. this was my second time taking the class, and I felt much more prepared for the exams, and actually succeeded during this class.

Identify the aspect of the course that you found most challenging, why you found it was challenging, and suggest one thing that could be done to help future students meet that challenge more effectively.

Comments
The second half of the course was significantly more challenging than the beginning, so it was a bit hard to keep up. Maybe having an extra recording or ta session for that portion of the class would be helpful.
The aspects that I found most challenging were the homeworks and one thing that could help future students would be to add notes for the R coding.
I found following along with lectures difficult, maybe slowing down?
second half of semester/learning new material
None.
The exams would be super content heavy that they were overall just hard to do well on
I found that understanding and keeping up with the work in the latter half of the course was very difficult. It was very obvious that the course difficulty took a huge step forward after the midterm.
There was nothing really challenging about this class. Bolfarine did a great job!
Time series was something I really struggled with, maybe going more into examples will help especially with the homework.
n/a
please spend a little less time on in class quizzes, and more time for the lecture so we are more prepared for the homeworks. :) otherwise no other challenges.
