

Individual Instructor Report Spring 2023 Version A for STA 301 - INTRODUCTION TO DATA SCIENCE (05290) (Henrique Bolfarine)

Project Title: **Instructor Course Evaluations Spring 2023**

Courses Audience: **29**

Responses Received: **10**

Response Ratio: **34.5%**

Report Comments

Results were collected during the implementation of a new course evaluation system.

Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. The two sets of scales used for core evaluation questions and the associated weights are:

Strongly Agree (5)
Agree (4)
Neutral (3)
Disagree (2)
Strongly Disagree (1)

Excellent (5)
Very Good (4)
Satisfactory (3)
Unsatisfactory (2)
Very Unsatisfactory (1)

The Mean is calculated by adding all of the weights for a single question and dividing by the number of respondents. The course workload question is not averaged.

The number of students (e.g. Respondents) marking each option is reported for each of the items. These frequency distributions provide information about the level of student ratings and the spread and shape of the class distribution of responses. The distributions thus provide a picture of student perception of a course.

Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no one method gives the complete picture of an instructor's teaching effectiveness; multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor.

Creation Date: **Friday, June 16, 2023**

Course Questions

Why did you take this course?

During this course, I gained a deeper understanding of the subject matter.

Statistics

Value

Mean

4.30

The course was well organized.

Statistics

Value

Mean

4.30

Overall, approximately what percentage of the course meetings did you attend or complete (online, in person, or asynchronously)?

Statistics

Value

Mean

89.00

The course assignments improved my ability to apply quantitative skills to real-world problems. (Flag Question)

Instructor Questions

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Responded	Mean
The instructor clearly explained the course objectives and expectations.	50.0%	20.0%	30.0%	0.0%	0.0%	10	4.20
The instructor fostered an inclusive learning environment.	70.0%	30.0%	0.0%	0.0%	0.0%	10	4.70
The instructor effectively explained the concepts and subject matter in this course.	60.0%	20.0%	20.0%	0.0%	0.0%	10	4.40
The instructional techniques kept me engaged in learning.	60.0%	10.0%	20.0%	10.0%	0.0%	10	4.20
The instructor checked for student understanding of the concepts presented in the course.	70.0%	10.0%	10.0%	10.0%	0.0%	10	4.40

Overall Questions

College, School, or Unit Questions

Comment Questions

Identify aspects of the course that were the most effective in helping your learning.

Comments
My professor this semester was helpful, understanding, and overall great at explaining the material. He is dedicated to his students.
I enjoyed reading the textbook chapters as they were organized in a digestible, informative, and interactive manner.
Using R-script in class and being able to tie back the conceptual content back to the assignments so students knew how to complete their homework.
The knowledge was so effective. I felt like I was able to practice over everything and figure out where I had problems.
The professor was extremely nice and funny which made lectures much more intriguing. He was very easy to approach and made the learning environment great.
na
quizzes
Bolfarine was a very nice guy and teacher overall.

Identify the aspect of the course that you found most challenging, why you found it was challenging, and suggest one thing that could be done to help future students meet that challenge more effectively.

Comments
The class is challenging; I'm not sure there is a better way than what he's doing now.
This course was the right level of challenging.
The mere fact that class content does not suffice the amount of knowledge you need to know in order to be successful in class– you need to read the textbook and go to office hours in order to fully grasp the content.
Sometimes the understanding of concepts was hard since we would spend most of the time using R (which is appreciated), but I would like to still have a little more time learning definitions, for example.
One thing that could change are certain questions in the knowledge checks. For the most part they were good, but some questions were extremely difficult to find the answers for in the textbook. This was not the end of the world because we had multiple attempts but it was frustrating trying to pinpoint specific answers when the questions on the KC's were vague and general. Just a minor issue, nothing else really was that harsh or bad.
lectures could've been more interactive or engaging
I wish there were more opportunities to boost your grade that did not rely so heavily just on the midterm and final.
