

Individual Instructor Report Spring 2023 Version A for STA 235 - DATA SCI FOR BUSINESS APPLCTNS (05340) (Henrique Bolfarine)

Project Title: **Instructor Course Evaluations Spring 2023**

Courses Audience: **61**

Responses Received: **22**

Response Ratio: **36.1%**

Report Comments

Results were collected during the implementation of a new course evaluation system.

Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. The two sets of scales used for core evaluation questions and the associated weights are:

Strongly Agree (5)
Agree (4)
Neutral (3)
Disagree (2)
Strongly Disagree (1)

Excellent (5)
Very Good (4)
Satisfactory (3)
Unsatisfactory (2)
Very Unsatisfactory (1)

The Mean is calculated by adding all of the weights for a single question and dividing by the number of respondents. The course workload question is not averaged.

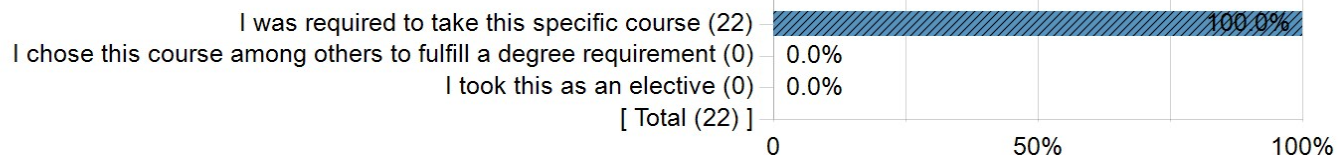

The number of students (e.g. Respondents) marking each option is reported for each of the items. These frequency distributions provide information about the level of student ratings and the spread and shape of the class distribution of responses. The distributions thus provide a picture of student perception of a course.

Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no one method gives the complete picture of an instructor's teaching effectiveness; multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor.

Course Questions

Why did you take this course?

During this course, I gained a deeper understanding of the subject matter.

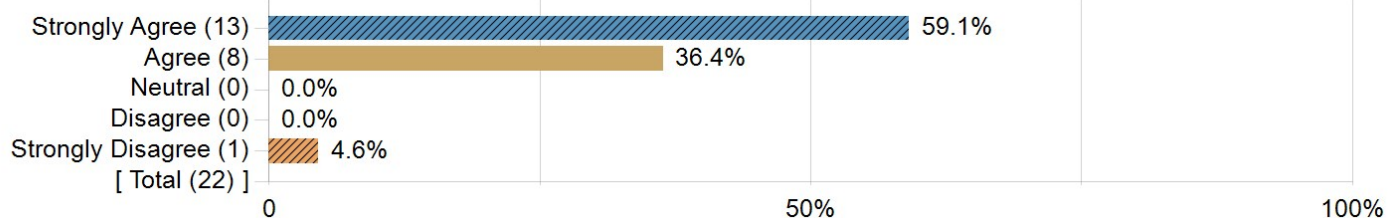

Statistics

Value

Mean

4.45

The course was well organized.

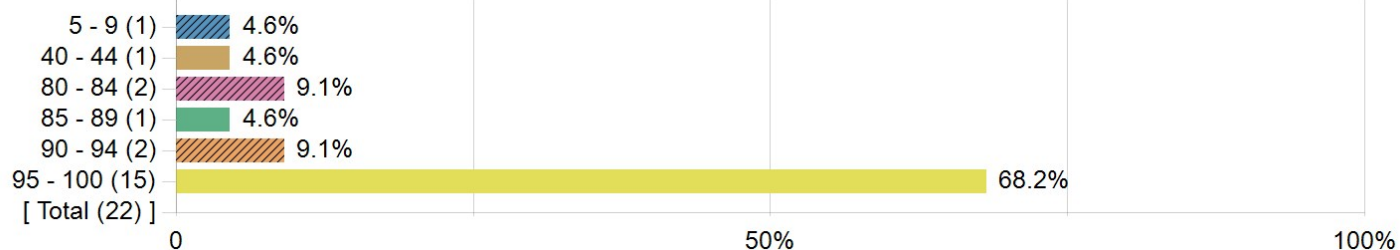

Statistics

Value

Mean

4.45

Overall, approximately what percentage of the course meetings did you attend or complete (online, in person, or asynchronously)?

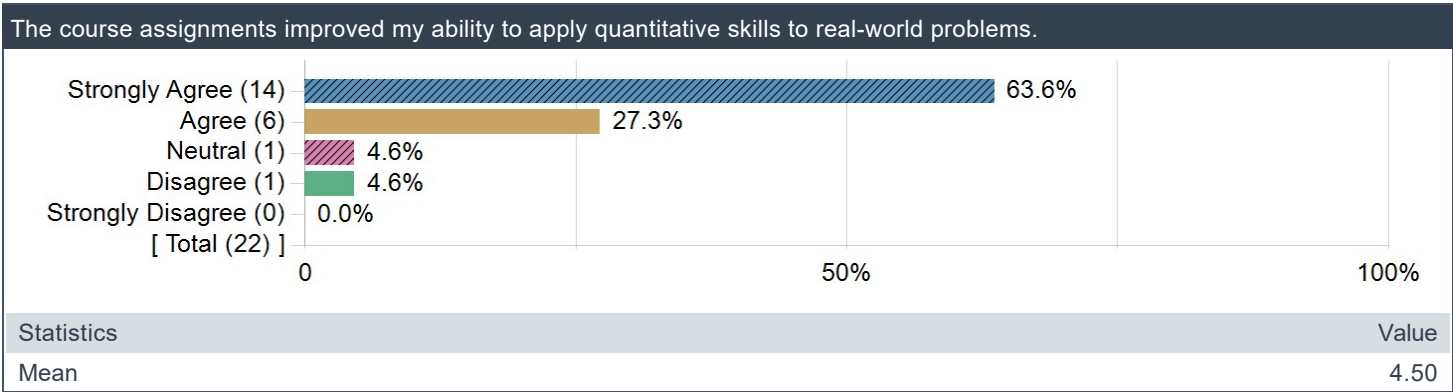

Statistics

Value

Mean

89.09

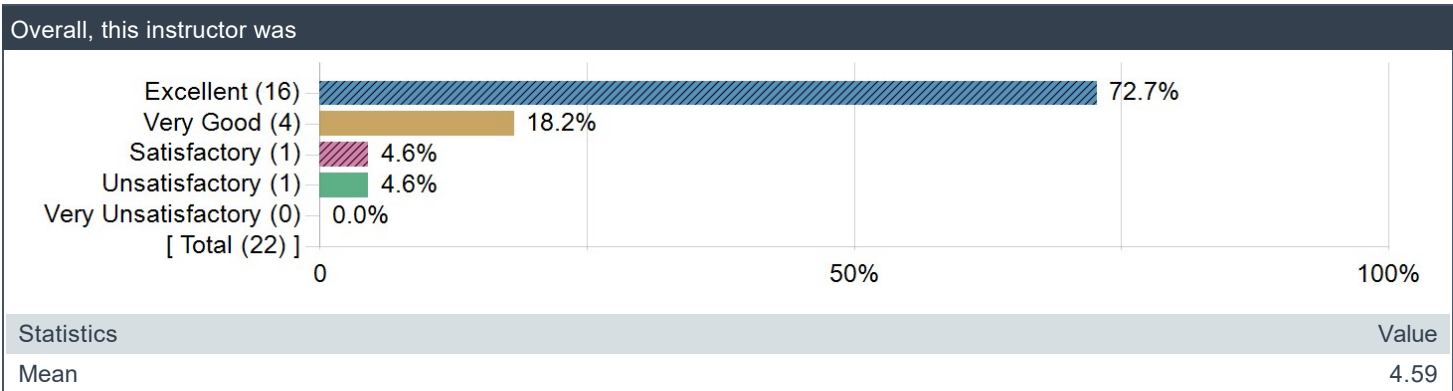

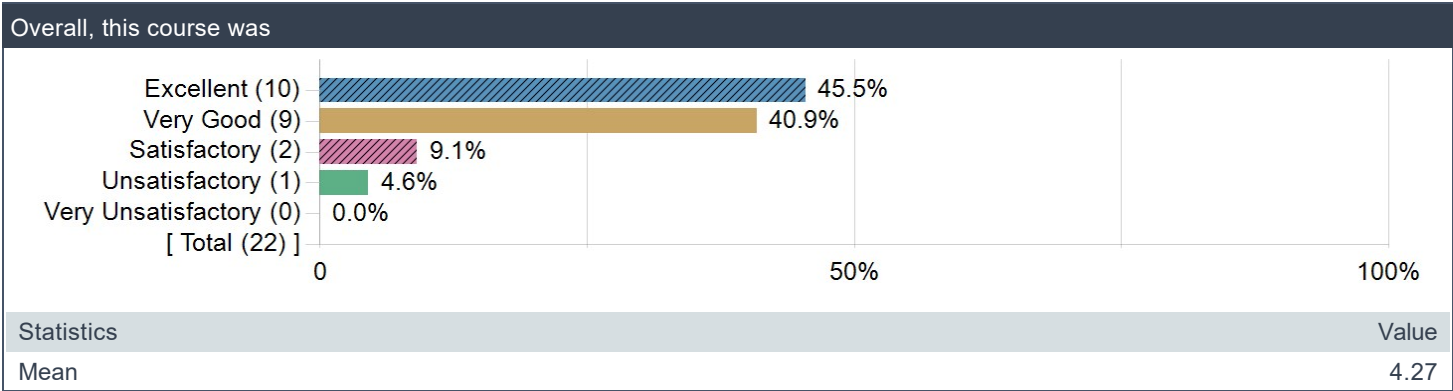

The course assignments improved my ability to apply quantitative skills to real-world problems. (Flag Question)

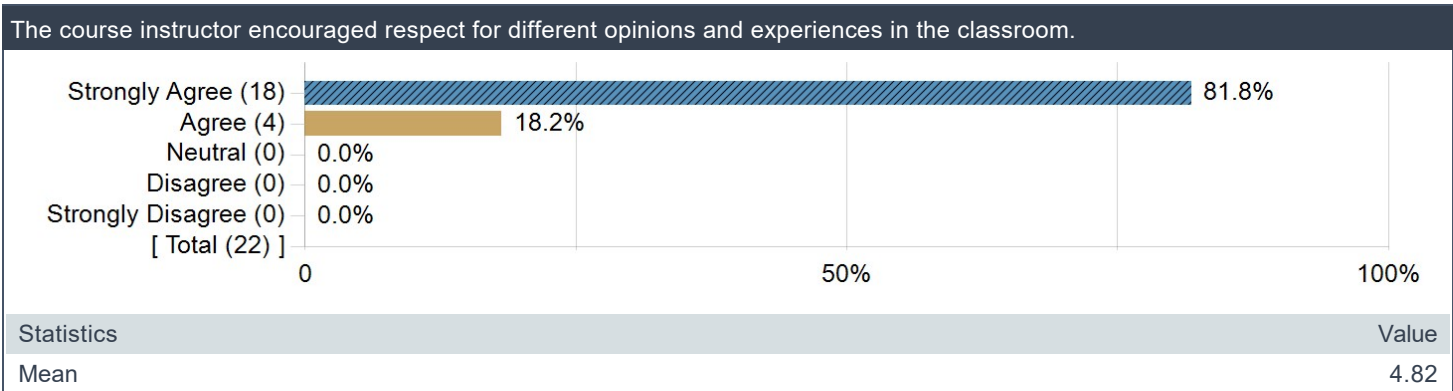

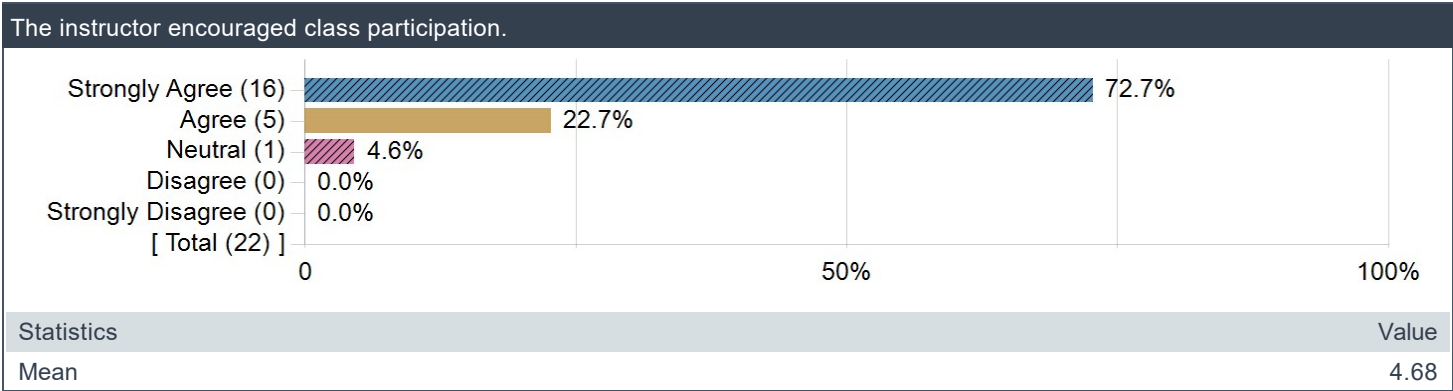

Instructor Questions

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Responded	Mean
The instructor clearly explained the course objectives and expectations.	72.7%	18.2%	4.5%	4.5%	0.0%	22	4.59
The instructor fostered an inclusive learning environment.	59.1%	31.8%	9.1%	0.0%	0.0%	22	4.50
The instructor effectively explained the concepts and subject matter in this course.	59.1%	27.3%	4.5%	9.1%	0.0%	22	4.36
The instructional techniques kept me engaged in learning.	54.5%	36.4%	4.5%	4.5%	0.0%	22	4.41
The instructor checked for student understanding of the concepts presented in the course.	68.2%	22.7%	9.1%	0.0%	0.0%	22	4.59

Overall Questions

College, School, or Unit Questions

Comment Questions

Identify aspects of the course that were the most effective in helping your learning.

Comments
Very sweet and understanding. Great Professor!
going through class problems together and quiz after class.
The homework assignments were always representative of what we worked on in class which was very helpful. The review sessions were also a lifesaver!!
Good lecturer
The classes overall were very good because he covered what we would most likely have trouble with and gave a more in depth explanation to us, which helped with the assignments given out. It also helped us view how we would be able to apply this outside of class. We would obviously need data but with just a certain amount of data we can find a lot of things on our own.
I found the homework to be very applicable to the test.
Fantastic professor, clearly proficient in the course material and excited to teach the subject. Highly recommend.
Lecture, class recordings, content checks
The homework assignments were the most helpful aspect of this course
Homeworks.
Going of homework assignments and listening to the professor's lecture. Sometime, the extensions of some assignments were really helpful.
The professor taking time and having after hours GTA support
–Lectures, homeworks helped apply concepts
Lectures were clear, well organized, and extremely effective in learning.
lectures and supplemental lectures
Connecting conceptual parts to technical parts

Identify the aspect of the course that you found most challenging, why you found it was challenging, and suggest one thing that could be done to help future students meet that challenge more effectively.

Comments
some questions on tests are not viewed in class, for the conceptual questions.
The exams were difficult. I think more reviews, and/or multiple practices would help
He would often get off topic, limited discussion of how to use the R code and would often have to upload additional information so that we could complete assignments. Added an extra class to go over a topic that was skipped. Was unaware of the scope of the final until the very end of the semester.
The assignments were the only thing but it was more due to it not fitting my schedule.
I found keeping up challenging at times.
My only complaint with this course is the time it was taught (4:00pm–6:00pm) and that it only met once a week.
Homeworks
The general format of this course was the most challenging aspect. Since the course only met once a week for 2 hours it was difficult to remember what content was covered during the prior lecture. I wish the course would have met twice a week for an hour instead. I feel this would allow for more continuity between topics in the course.
study guide / in class exam review.
Trying to practice more with interpretations of what we are trying to solve. Solving the problem (inputting) the code is simple, the hard part is being able to interpret it.
This class is being taken by other majors and should be kept simplified and not made complex by tough questions in the exams
–Prediction project was tough, also homeworks were effective but very long –To fix it maybe have more assignments but shorter ones
The material was just tough, especially after the midterms. I think more class time would be better for this, perhaps smaller but more frequent assignments.
the homework
I think the pacing was off for a few classes
