

Individual Instructor Report Spring 2023 Version A for STA 301 - INTRODUCTION TO DATA SCIENCE (05275) (Henrique Bolfarine)

Project Title: **Instructor Course Evaluations Spring 2023**

Courses Audience: **37**

Responses Received: **12**

Response Ratio: **32.4%**

Report Comments

Results were collected during the implementation of a new course evaluation system.

Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. The two sets of scales used for core evaluation questions and the associated weights are:

Strongly Agree (5)
Agree (4)
Neutral (3)
Disagree (2)
Strongly Disagree (1)

Excellent (5)
Very Good (4)
Satisfactory (3)
Unsatisfactory (2)
Very Unsatisfactory (1)

The Mean is calculated by adding all of the weights for a single question and dividing by the number of respondents. The course workload question is not averaged.

The number of students (e.g. Respondents) marking each option is reported for each of the items. These frequency distributions provide information about the level of student ratings and the spread and shape of the class distribution of responses. The distributions thus provide a picture of student perception of a course.

Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no one method gives the complete picture of an instructor's teaching effectiveness; multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor.

Creation Date: **Friday, June 16, 2023**

Course Questions

Why did you take this course?

During this course, I gained a deeper understanding of the subject matter.

Statistics

Value

Mean

3.67

The course was well organized.

Statistics

Value

Mean

3.50

Overall, approximately what percentage of the course meetings did you attend or complete (online, in person, or asynchronously)?

Statistics

Value

Mean

84.83

The course assignments improved my ability to apply quantitative skills to real-world problems. (Flag Question)

Instructor Questions

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Responded	Mean
The instructor clearly explained the course objectives and expectations.	8.3%	41.7%	33.3%	16.7%	0.0%	12	3.42
The instructor fostered an inclusive learning environment.	25.0%	50.0%	25.0%	0.0%	0.0%	12	4.00
The instructor effectively explained the concepts and subject matter in this course.	8.3%	66.7%	8.3%	16.7%	0.0%	12	3.67
The instructional techniques kept me engaged in learning.	16.7%	41.7%	8.3%	16.7%	16.7%	12	3.25
The instructor checked for student understanding of the concepts presented in the course.	16.7%	41.7%	16.7%	25.0%	0.0%	12	3.50

Overall Questions

College, School, or Unit Questions

Comment Questions

Identify aspects of the course that were the most effective in helping your learning.

Comments
Knowledge checks and homework assignments
I enjoyed having walk-throughs on how to use R especially with KCs. The professor did a good job at showing us how to use R.
It was very organize and the professor was very nice, knowledgeable, and available to help.
The textbook was very helpful.
The homeworks and KCs in canvas let me tackle problems on my own which was helpful.
Knowledge checks were amazing
engaged with the classroom
I found that the book and the professor relating to the book heavily were very helpful and effective in my learning of the course material.
R sessions/ KCs

Identify the aspect of the course that you found most challenging, why you found it was challenging, and suggest one thing that could be done to help future students meet that challenge more effectively.

Comments
The most challenging part was understanding the course content, I found that I had to teach myself more often than not. The presentations could be more thorough and guide us through the R programming instead of them being separated.
I wish class was a bit more organized and more strongly-structured.
maybe less content since the course has so many lessons. It can be easy to get behind.
I think the pacing of the class is way too fast. In most classes we did not get through all the material and were expected to learn it on our own.
One thing that was challenging was the the linear regression unit. If we went slower in the lecture, it could have helped.
I found the midterm most challenging
the lectures
I found the exams to be the most challenging. I liked them but lots more studying would be helpful.
