Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no individual method gives the complete picture of an instructor's teaching effectiveness, multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor. For additional details, including the scales and how the Mean scores are calculated, please review the Report Guide at the end of this document or, [UT Austin's Viewing Course Evaluation Results webpage](#).

Creation Date: **Friday, July 3, 2026**

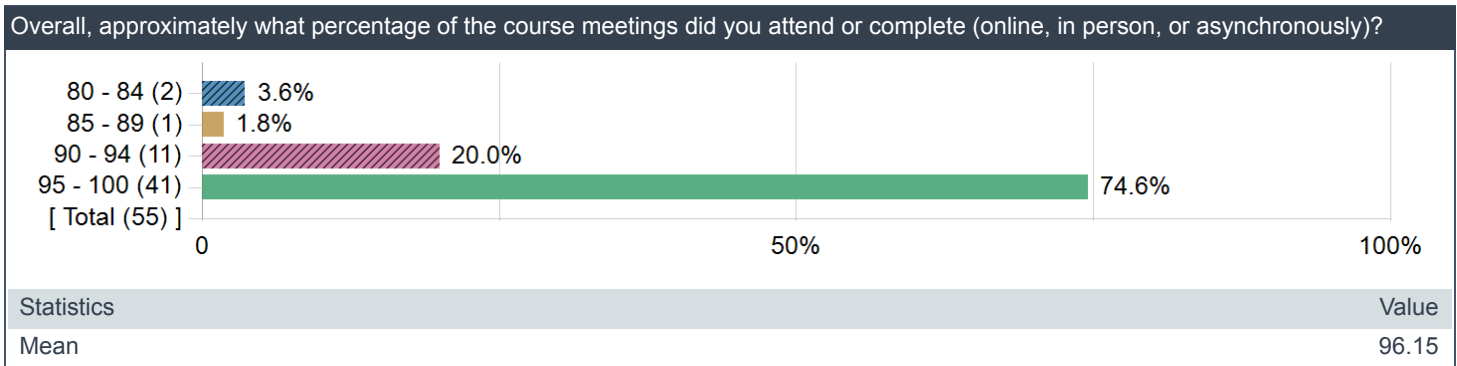

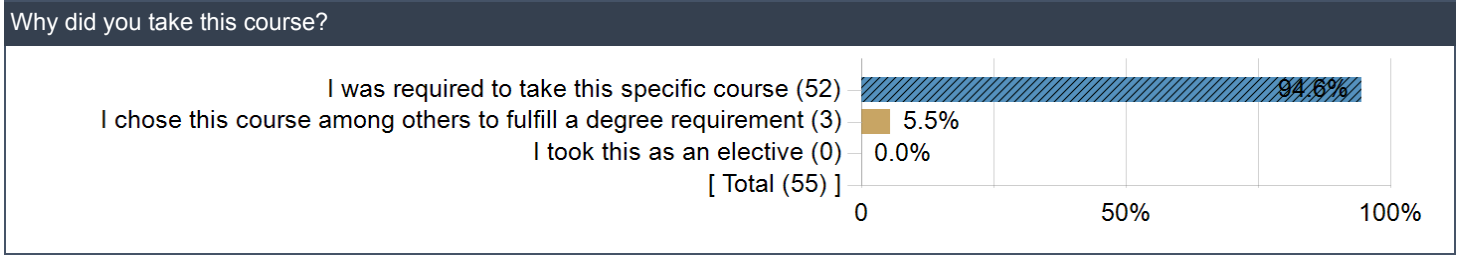

Core Questions

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Responded	Mean
During this course, I gained a deeper understanding of the subject matter.	47.3%	47.3%	3.6%	1.8%	0.0%	55	4.40
The course was well organized.	52.7%	43.6%	3.6%	0.0%	0.0%	55	4.49
The instructor clearly explained the course objectives and expectations.	63.6%	32.7%	3.6%	0.0%	0.0%	55	4.60
The instructor fostered an inclusive learning environment.	83.6%	14.5%	1.8%	0.0%	0.0%	55	4.82
The instructor effectively explained the concepts and subject matter in this course.	72.7%	25.5%	1.8%	0.0%	0.0%	55	4.71
The instructional techniques kept me engaged in learning.	58.2%	30.9%	10.9%	0.0%	0.0%	55	4.47
The instructor checked for student understanding of the concepts presented in the course.	65.5%	32.7%	0.0%	1.8%	0.0%	55	4.62

Overall Questions

	Excellent	Very Good	Satisfactory	Unsatisfactory	Very Unsatisfactory	Responded	Mean
Overall, this instructor was	69.1%	27.3%	3.6%	0.0%	0.0%	55	4.65
Overall, this course was	43.6%	36.4%	18.2%	1.8%	0.0%	55	4.22

Other Course Questions

Comment Questions

Identify aspects of the course that were the most effective in helping your learning.

Comments
Weekly Quizzes
The Professor was patient and gave many opportunities to learn the material each week.
Made sure we were attentive
Homeworks and quizzes
The most effective aspects in learning were certainly the homeworks. I feel like they touched on everything we learned in class and prepped me well for the exams.
He was funny and engaging
The in class quizzes and lectures were well organized and simialr to the questions, formatting, and topics on the exams that helped me accurately prepare for exams and the class content.
The sheer amount of exercises that were available to us, let that be from homework, quizzes, or practice tests.
The lectures were the most effective
The quizzes were good because they served as a consistent learning check. Prof. Bolfarine's office hours were also really helpful.
His check-ins and answering questions during class
Professor Bolfarine was very engaging which helped a lot!
He made a calendar with all the office hours for each class and TA's and also made himself available to help
Very nice professor and homeworks/quizzes well prepared me for exam.
Funny
lots of the time before our weekly quiz, Bolfarine would tell us what to look out for, which triggered my active recall and cemented ideas in my head.
Professor Bolfarine is a very engaging and caring professor. He truly cares for his students and wants them to succeed.
Professor Bolfraine was awesome, this was significantly better than STA 301.
in person
Class discussions and homeworks
Doing practice problems in class was very helpful
studying for the quizzes helped me learn the information better, and ultimately helped prepare me for the exams.
Fairly engaging lectures and can do lots of studying with the canvas resources provided when outside of class.
Very engaging and always makes sure the class in focused.
The end quiz of class and actively participating in class.
The most effective aspect were the homeworks. Although they were lengthy and multiple, they really helped hone in topics.
funny and great professor. i liked how he showed us how to do the problems, rather than let us on our own / flipped classroom to figure it out, because stats requires some hand holding at first!
Quizzes
Bolfarine has a great and approachable personality, makes stats more enjoyable
Class lectures
He would go through and built the R code with us and basically do an example and slow down and explain each part along the way. The pacing was great, and class is directly applicable to what we are expected to know on the tests.
I really love all the resources provided, a lot of opportunities to interact and learn the content with different learning styles kept in mind. Also very understanding and patient. This is one of the few time I felt like a business course professor actually cared about helping us understand the concept rather than just telling us to figure it out on our own.
He was a great professor and very relatable as students
He was extremely genuine in his teaching style and made the class fun and interactive
I think Professor Bolfarine explained concepts very clearly, and even though the course was challenging, I stayed engaged and learned a lot. I also appreciated the sense of humor throughout the lectures, it made the class much more enjoyable. Also, I appreciated the flexibility with assignments and the opportunity for multiple attempts, I think it showed that the professor cared about us truly understanding the material and learning how to solve problems on our own.
The lectures and in class R-studio practice were very helpful in my learning.
Dr. Bolfarine showed us how to use R in real time, so we would do the class using R which was so helpful because we also took notes while doing the coding, so that was really helpful

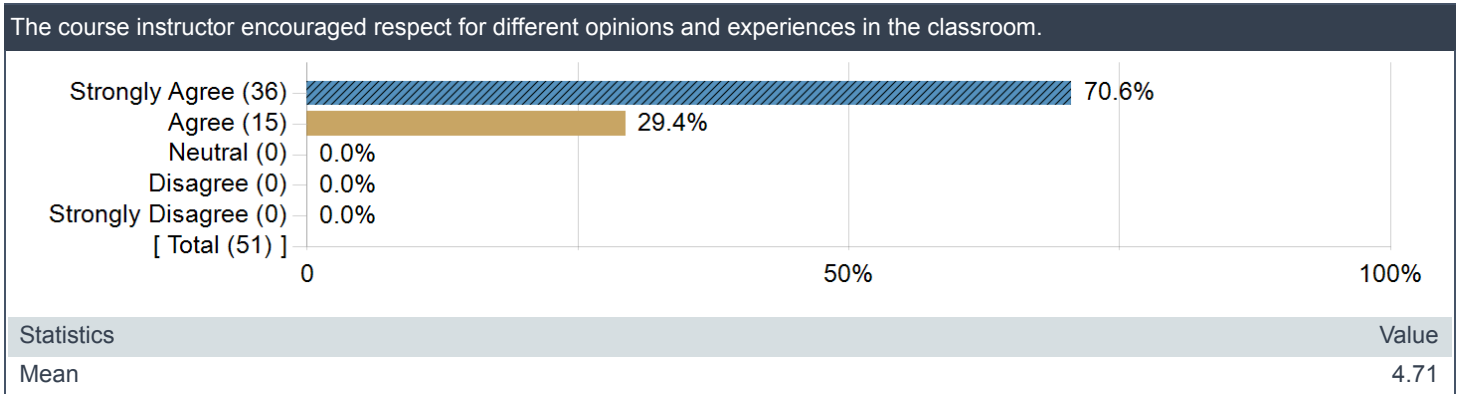

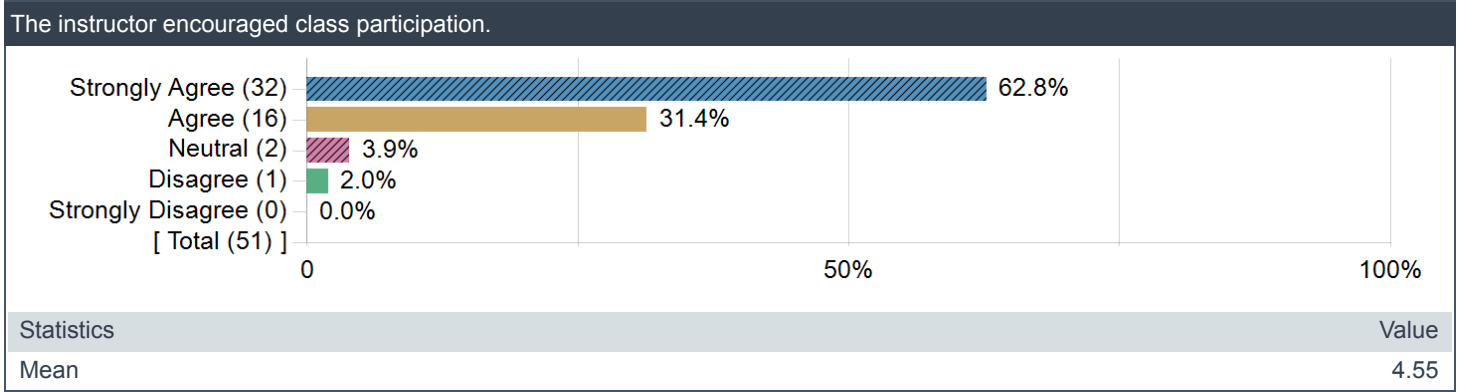

Comments
He taught the code line by line.
Professor Bolfarine is amazing! He cares so much about every student and wants to make sure they truly understand the concepts within STA235 and perform well on tests and quizzes.
The lectures most definitely.
The lectures
Homeworks and Recorded Lectures
The class recordings/lectures

Identify the aspect of the course that you found most challenging, why you found it was challenging, and suggest one thing that could be done to help future students meet that challenge more effectively.

Comments
The tests by far
The subject matter itself is a little too challenging for a 2 credit hour class. I thought that the two hour weekly format was just a little too much for one sitting. A suggestion I have is to make it fully asynchronous so lectures can be viewed at own pace or splitting the two hours into two days.
Just not interesting content
The exams and the amount of information covered.
The aspect of the course that was most challenging was certainly the quizzes.
Some of the content is naturally hard but the materials given to us were very helpful
I found the quizzes most challenging in class that left me little room for error and space in my grade to preform well in the class. It felt difficult to have any room for error and make mistakes while taking the class throughout the semester.
The most challenging part was definitely the quizzes in class. They required to stay up to date with the class and have a deeper understanding of the topic rather than a superficial one. A tip for future students would be to fully understand every single aspect of the homework, understanding how each calculation is done, why an option is specifically correct or incorrect, etc.
The quizzes at the start of each class I found to be the most challenging. Instead of helping me gain a better understanding, they made me feel less confident about the material, and sometimes it takes longer for a student to understand the material, so it is not very fair to some students. I suggest that the homework better reflects what will be on the quiz, and to make the quizzes be retakable or get points back, or maybe even make them group quizzes to help work through the problems with peers.
The exams
The quizzes were a bit excessive
This is a hard course in terms of interpreting the code once you master it. Conceptually it is tolerable however.
hard class material but work well prepapred me for midterm
Hard tests
The weekly quizzes and at times the exam questions were worded strangely and the essay section graders are very picky
I think the weekly quizzes was too much. They ended up being very difficult.
The quizzes were stressful each class.
coding
Weekly Quizzes
I found the in class quizzes to be very challenging, my cumputer was often very slow with the respondus lockdown browser. I also feel like the quizzes could be slightly more related to the homeworks instead of seeing a concept for the first time on a quiz.
i feel like the perusalls didnt help all that much.
Sometimes disorganized or hard to follow. Wish there was also more practice exams/questions available and more thorough explanations of tricky questions from the homeworks.
I don't see any room for improvement. He was great in all aspects!
Prepare more interactive parts of class
The most challenging were the exams as they were kind of different from the way material was presented to us in class.
new stats concepts, but professor was great at walking through it with us
Exams
Bolfarine sometimes took extra time after the end of class to finish in-class assignments, as they were graded, I had to stay when I had other commitments. Keeping the class on time would help students balance other classes and work.
Homework's were often much harder than what we did in class
Lockdown browser always breaks on mac.
The readings deadlines were random and hard to remember and keep ups with.
Coding
Sometimes the lectures would tend to drag on
The course itself is quite challenging, but Professor Bolfarine did a great job explaining the material clearly.
I found it challenging to keep up with the quizzes towards the end of the semester. I sometimes felt the content in the quizzes were different from what I expected in the homework and in class practice.

Comments
N/A
The course was very code heavy and memorization focused which isn't needed for jobs.
STA 235 can be a challenging class, especially with certain wording on quizzes and homework. Going to his office hours is vital.
The readings were not that beneficial.
The quizzes with lockdown browser
Weekly quizzes in class. Potentially making them more collaborative could help students.
The quizzes were inconsistent and had to be regraded multiple times. I would suggest providing the correct answers/explanation to help for studying purposes.

College, School, or Unit Questions

Report Guide

Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. The two sets of scales used for core evaluation questions and the associated weights are:

Strongly Agree (5)
Agree (4)
Neutral (3)
Disagree (2)
Strongly Disagree (1)

Excellent (5)
Very Good (4)
Satisfactory (3)
Unsatisfactory (2)
Very Unsatisfactory (1)

The Mean is calculated by adding all of the weights for a single question and dividing by the number of respondents. The course workload question is not averaged.

The number of students (e.g. respondents) marking each option is reported for each of the items. These frequency distributions provide information about the level of student ratings and the spread and shape of the class distribution of responses. The distributions thus provide a picture of student perception of a course.

Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no individual method gives the complete picture of an instructor's teaching effectiveness; multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor.
